AT A GLANCE

SEE THE UNSEEN

SWAROVSKI
OPTIK

INNOVATIVE, HIGH QUALITY, AND SUSTAINABLE

SWAROVSKI OPTIK stands for innovation, top quality, and sustainability. As a global market leader in the development of sport optics, we are offering you even more awe-inspiring experiences in nature with the new handheld AT/ST Balance spotting scope. The integrated image stabilization reveals all the amazing details that would otherwise remain hidden - from a movement at the edge of a forest that catches your attention to a vague outline in the distance. Too far to see clearly, yet close enough to know: this moment counts.

Our products make it possible to experience the beauty of nature in awe-inspiring clarity and enjoy unforgettable moments. Our premium products offer you the reassurance of top quality and reliable performance. Appreciation for nature is a core element of our company philosophy and is reflected in our environmentally friendly production. For the love of nature.

In our blog
we share special
experiences in nature.

DIGISCOPING

THE BEAUTY OF NATURE
NEVER CEASES TO FASCINATE US.
PRESERVE THE JOY OF YOUR DISCOVERIES.

An appropriate adapter allows you to easily combine your binoculars or spotting scope with your smartphone or a digital camera.

Here are four tips for taking photos
that will leave a lasting impression:

1

START SLOWLY

Choose subjects that are within close range for your first photos. It's best not to use too much zoom to begin with. Even the slightest camera shake can make your photo look blurred.

2

PRE-FOCUSING

It can be difficult to focus on animals because they are usually in motion.

It's easier if it is pre-focused on a stationary object – like a tree for instance – using live-view mode.

3

TRY OUT DIFFERENT ANGLES

People often start out taking photos of wildlife from the side. Unusual perspectives and creative viewing angles will add a particularly exciting touch to your pictures.

4

PRACTICE MAKES PERFECT

Once you get a feel for your equipment, your photos will improve by leaps and bounds.

VPA 2 AMAZING VERSATILITY

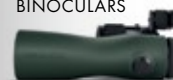

With the VPA 2 variable phone adapter, you can connect your smartphone to your SWAROVSKI OPTIK binoculars or spotting scope in an instant to enable you to capture those unique moments.

THE WORLD'S FIRST SWAROVSKI OPTIK STORE

SWAROVSKI OPTIK wants to inspire people to love and care for nature. Only those who look closely and consciously appreciate the moment can recognize the beauty of nature around us and the need to protect it. Experience our brand and our convictions for yourself: **in the world's first SWAROVSKI OPTIK Store.** Chat with us and try out our latest products.

A PLACE FOR NATURE LOVERS

Step inside and discover a space infused with the love of nature. On the back walls, vertical strips of solid wood create an impression of depth, inspired by forest views. A clay wall, stones from a nearby quarry, and a striking tree rootstock bring the natural world inside, while the large glass frontage creates a seamless transition to the outdoor environment and opens up amazing views. The roof of the new SWAROVSKI OPTIK store is covered with lush greenery consisting of local plants such as ivy, wild grapevine, hops, and grasses.

SPORT OPTICS UP CLOSE

Within approximately 50 m², you can browse the complete range of binoculars and spotting scopes – from the compact foldable CL family to the powerful NL Pure, and the new AT/ST Balance spotting scopes. You can also discover practical and sophisticated accessories. Try out the latest products and take advantage of expert advice.

PAUSE AND SAVOR THE MOMENT

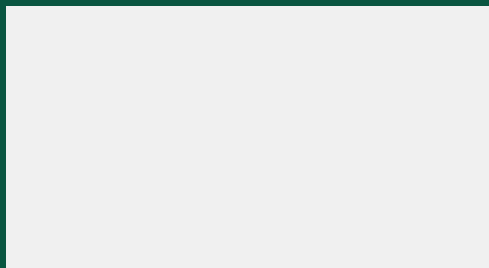

A cozy lounge area invites visitors to relax and enjoy stunning views of the Tyrolean mountain scenery. If you happen to feel thirsty, you can fill your drinking bottle with crystal-clear spring water in the middle of the store. What's more, SWAROVSKI OPTIK WB insulated water bottles are available for sale in the store, which can even be engraved for you while you wait. 'See the unseen' also applies outside the store. The SWAROVSKI OPTIK MEX e-bike is an additional attraction that allows visitors to easily try out a wide range of sport optics directly on site.

You can find more information and the precise location here.
